

Portrait Puzzles

Portrait: A portrait is a picture of a person, or sometimes a group of people, that's made to show what they look like, or even what they're like. It could be a painting, drawing, photograph, or even something made with clay or other materials. The goal is to capture the person's appearance and maybe a little bit of their personality too.

- 1) Choose one portrait

- 2) Think about the following questions:

How would you describe this person?

What clues are there in the portrait to tell us about them?

If you met this person, what would you like to ask them?

If you were having a portrait created what clues and symbols would you choose to put in the portrait to tell us about yourself?

- 3) Now, either **copy** the portrait **or** draw a **portrait of yourself**.
