Big 5

- 1) Select an item

Write down **5 things** that you can **see**/that you **notice**

Think about what it is made of; what is the use of the object; do you recognise it; does it remind you of anything else?

- 2) Now, write down 5 **inferences** that you can make about the item
(Remember to include **why** you have made that inference)

e.g. I think that the object will be hard because it is made of metal.

The object may be made of wood so that it is not a thermal conductor (and you won't burn your hand whilst using it)

- 3) Finally, write down 5 **questions** that you have about the item
(Remember your question marks!)
